

WHO WE ARE

The Presbyterian Church in America (PCA), of which the New Jersey Presbytery is an affiliated member, is one of the fastest growing denominations in the North America. It is comprised of more than 1700 churches and missions in the United States and Canada.

The PCA is firmly committed to the Holy Scriptures, the Bible, as the Word of God and to the proclamation of the Gospel of Christ in local and world missions. We understand that evangelism and church growth is most efficiently accomplished through church planting. We believe Christian Education is essential and recognize the value of historic Presbyterianism, the Reformed Faith, and seeks to be obedient to its Head, Jesus Christ, to make disciples throughout the entire world.

The Presbytery is affiliated with the PCA Metro Philadelphia Church Planting Partnership, www.cpphilly.net with which it coordinates its activities. This partnership brings several benefits, including the services of and recruits from their Church Planter Assessment Center.

The New Jersey Presbytery administers its strategy to plant and establish new churches in South Jersey through its Mission to North America Committee (NJMNA) composed of three teaching elders and two ruling elders.

WHY PLANT IN SOUTH JERSEY

It is Sunday in Nigeria, so why so few in their homes? The reason — 89% percent of Nigerian adults regularly attend church. It is also Sunday morning in Russia, so why so many in their homes? Only 2% of Russians attend church on regular bases.

In the United States the number attending church on a regular bases is 44%, and in NEW JERSEY 34%, right behind The Netherlands.

TRANSLATION: Two-thirds of the residents in South Jersey do not regularly hear the gospel preached.

Jesus looked over the grain fields of Samaria and declared, *"...open your eyes and look at the fields! They are ripe for harvest."* He was speaking of those that had not yet heard the Gospel.

By God's grace our **VISION 20/20** challenge will make South Jersey more like Nigeria, by gathering many who have not been touched by the gospel into loving places of worship, from all people groups.

Phil and Polly Henry and their 6 children planting Mercy Hill Presbyterian Church.

THE SOUTH JERSEY PLAN

The New Jersey Presbytery has embarked on a plan to plant *at least* one church in Southern New Jersey per year. Our **VISION TWENTY/TWENTY** slogan captures our goal of *at least* twenty churches in our Presbytery by year 2020, growing from our current eleven established churches.

A GREAT START

In 2009 the New Jersey Presbytery initiated churches in Atlantic City and in Gloucester County. A third church is scheduled for planting in the City of Camden early 2011, and a church planter is now being recruited for the Township of Hamilton. First steps are also being taken for a Hispanic Church in the Vineland-Bridgeton-Millville region.

Other municipalities targeted for future PCA churches include Toms River Township, Brick Township, City of Trenton, Manchester Township, Jackson Township, and Asbury Park. It is anticipated daughter churches will also be started by some of our new church plants.

Strategies are in place to ensure the availability of qualified pastors to start the PCA congregations, who are suited for the cultural and demographic challenges associated with targeted communities.

THE FUNDING CHALLENGE

The New Jersey Presbytery is committed to reducing the fundraising burden on our church planters prior to their moving, and their first three years on the field. With multiple churches at different stages of development as the program unfolds, our funding requirement will accrue to \$220,000 per year.

To raise these crucial funds we must rely heavily on the generosity of interested parties both in and beyond our Presbytery.

We respectfully encourage you to join us in reaching, even exceeding, our **VISION 20/20** goal. Your generous donations and pledges are crucial to our accomplishing this. Please see the back panel for information on how you can participate in this exciting and important Kingdom endeavor.
